CMPG311 – Databases Assignment 2

1. For each table, identify the primary key and the foreign key(s). [7]

TABLE	PRIMARY KEY	FOREIGN KEY(S)
EMPLOYEE	EMP_CODE	STORE_CODE
STORE	STORE_CODE	REGION_CODE, EMP_CODE
REGION	REGION_CODE	No Foreign Key

2. Do the tables exhibit entity integrity? Answer yes or no and then explain your answer. [6]

TABLE	ENTITY INTEGRITY	EXPLANATION
EMPLOYEE	YES	Each row in the EMP_CODE primary key is unique, and no value of the primary key contains a null.
STORE	YES	Each row in the STORE_CODE primary key is unique, and no values of the primary key contains a null.
REGION	YES	Each row in the REGION_CODE primary key is unique, and no values of the primary key contains a null.

3. Do the tables exhibit referential integrity? Answer yes or no and then explain your answer. [6]

TABLE	REFERENTIAL INTEGRITY	EXPLANATION
EMPLOYEE	YES	The foreign key STORE_CODE refers to existing and corresponding primary keys in the STORE table.
STORE	YES	The foreign keys REGION_CODE and EMP_CODE refers to existing and corresponding primary keys in the REGION and EMPLOYEE tables.
REGION	NO	There are no foreign keys being used inside the REGION table that refers to another tables primary keys.

4. Describe the type(s) of relationship(s) between STORE and REGION. [2]

- There is a one-to-many relationship between the STORE and REGION entities.
- One REGION is the location of many STORES.
- Each STORE is located in one REGION
