CMPG311

- Dosent/Lecturer: Mnr./Mr. Henri van Rensburg
 - Kantoor/Office: G3, G22
 - Departement: Rekenaarwetenskap & Inligtingstelsels
 - Tel.: Computer Science and Information Systems (018) 299-4275
 - E-pos/Email: **Henri.vanRensburg@nwu.ac.za**
- Module support & Tutor: (eFundi)
 - E-pos/Email: (eFundi)

Lecturers

Potchefstroom Campus (PC)

Lecturer:	Mr. Henri van Rensburg
Position:	Lecturer
Email:	Henri.vanRensburg@nwu.ac.za
Telephone	+27 18 299 4275
Building and Office:	Building G3 - G22
Consultation Hours:	Please see availability, per appointment

Vanderbijlpark Campus (VC)

Distance Students (D)

Lecturer:	Mr. Johan Prinsloo	Dr. Jaco Pretorius
Position:	Lecturer	Lecturer
Email:	Johan.Prinsloo@nwu.ac.za	Jaco.Pretorius@nwu.ac.za
Telephone	+27 16 910 3275	+27 16 910 4985
Building and Office:	Building 8 - Gxx	Building 8 - G35
Consultation Hours:	Please see availability, per appointment	Please see availability, per appointment

Contact & Consultation

- Emails: any time during the week
- In person: after class /
during consultation time (in office) /
per appointment
- Online: per appointment
- Module support: Mr. Given Mnisi
(givenmnisi6@gmail.com) and
Mr. Stefan Pretorius

OVERVIEW

Welcome

CMPG321 - Advanced DATABASES

Please familiarise yourself with the Study Guide on the left where module information and study units are detailed.

First class - Monday 08 July @ 11:00 in G20-G01

Module plan:

SU-Textbook | Assessment_Plan | Schedule

CMPG321 – Assessment Plan (Prelim. - not final)

The assessment components provided below form part of the portfolio of marks.

The weights as indicated is merely an estimate however, the list below provides the order of importance (those listed first baring the most weight):

1. Project
2. Tests
3. Revision Quizzes
4. Homework & Assignments

CMPG321 - Learning Portfolio	
Nr. Of Assessments:	4
<u>Weights:</u>	
Assessment 1 - Project	40%
Assessment 2 - Tests	25%
Assessment 3 - Revision Quizzes	15%
Assessment 4 - Homework & Assignments	20%
	100%

CMPG321 – Assessment Plan

1. The project (Deliverables 1, 2, 3 and 4) = 40%

Type: Group Assignments

Weighting: 40% *(Project divided in 4 parts that can be completed independently)*

Weighting of each deliverable:

Deliverable 1 = 10%

Deliverable 2 = 5%

Deliverable 3 = 10%

Deliverable 4 = 15%

Group project to study, summarise and implement Database Development Life Cycle stages from Requirements planning, Conceptual Design and Logical design as well as Implementation through Oracle SQL fundamentals including user and object creation- and management, the manipulation of large data sets. The project is completed in groups of 3 to 5 students and submitted deliverable(s) with detailed topic discussions, practical SQL statements and output examples (where necessary)

CMPG321 – Assessment Plan

2. Semester Test = 25%

Timed tests through an online management system

Weighting: 25%

These tests will consist case studies, application type of questions that can include true and false, multiple choice, short answer questions and may include longer open ended questions or exercises. The semester test will be between 50 and 60 marks, and students will have enough time to complete it online (1-1.5 hours)

CMPG321 – Assessment Plan

3. Practicals & Revision Quizzes = 15%

Weighting: 15%

Practical assignments with short questions, scenarios or exercises to be completed and submitted on eFundi as indicated/communicated.

Revision Quizzes are available to be completed after each chapter/study unit. It is used to deepen your theoretical understanding and show which topics have been mastered and which topics need more work. Each revision test consisted mostly of true and false, multiple choice and short answer questions.

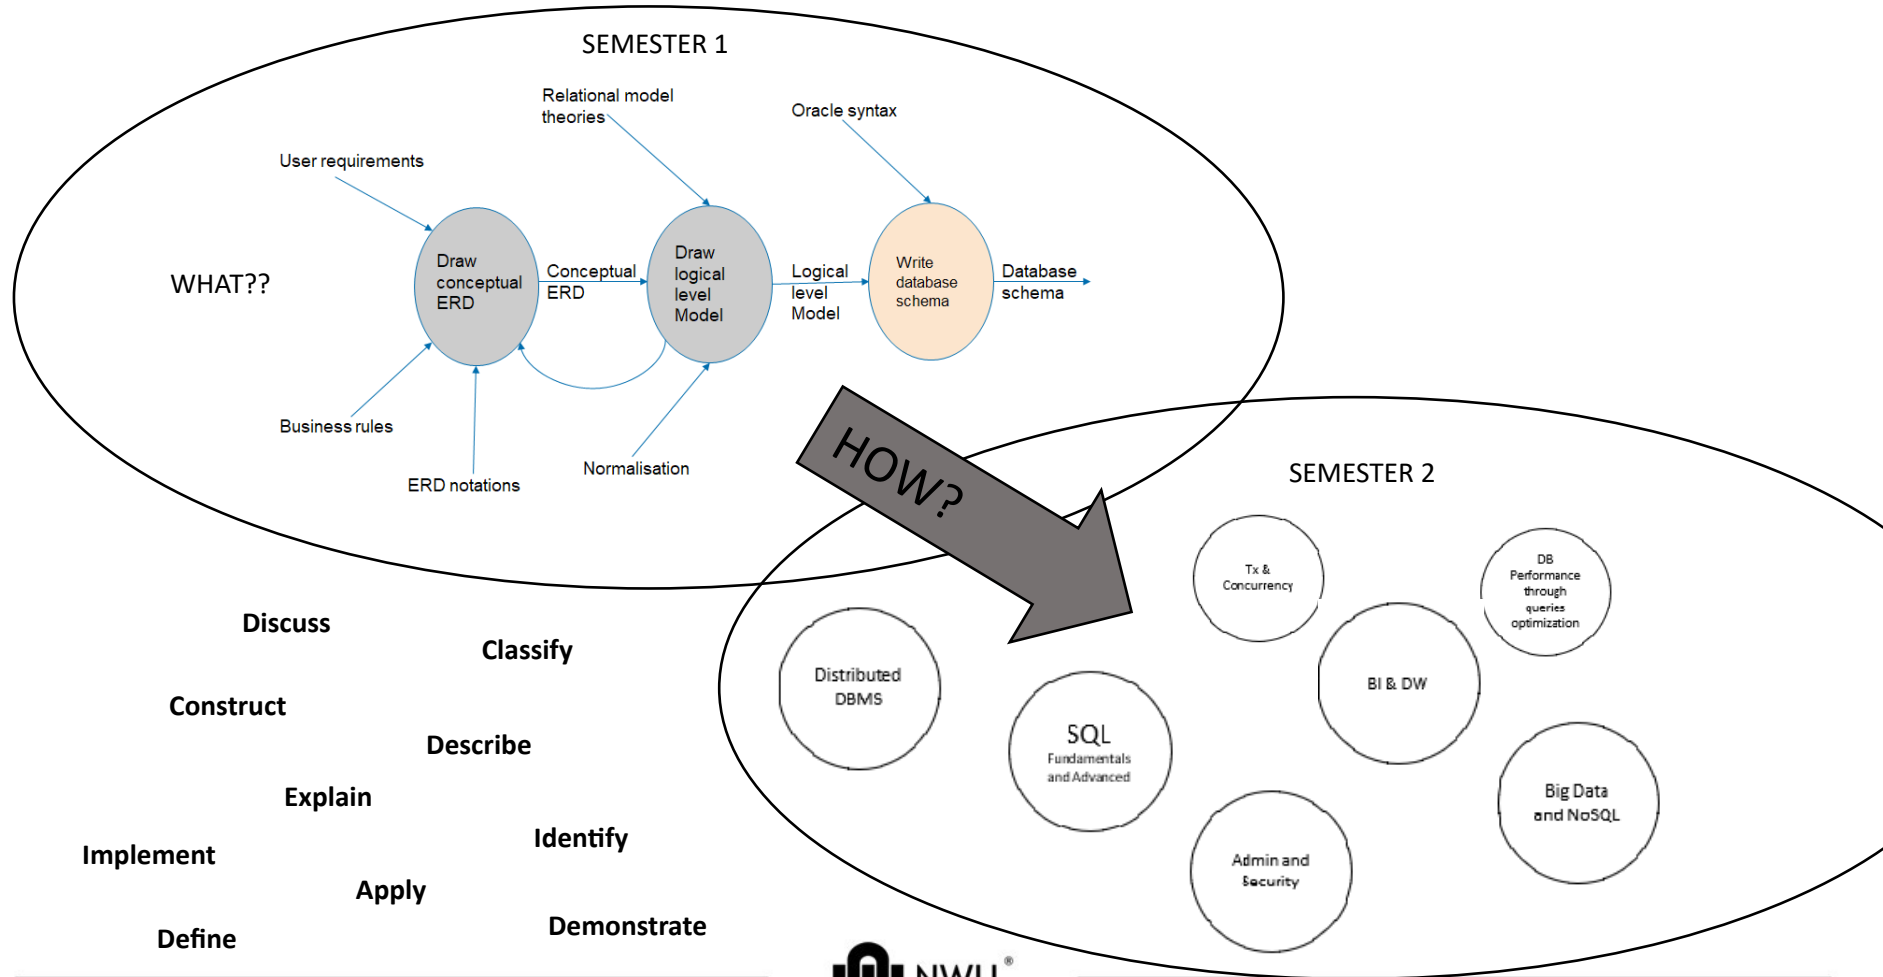

CMPG321 – Assessment Plan

4. Homework assignments = 20%

Weighting: 20%

Individually completed assignments with short questions, scenarios or exercises to be completed and submitted on eFundi as indicated/communicated - the homework assignments will mostly comprise of practical database applications.

Context of CMPG 321

CMPG321

- Homework assignment
 - Prof Gunther – Programming coaching (C, Python, etc..)
 - Monday / Tuesdays / Wednesday afternoons?
 - Ensure you can sign onto eFundi and see the sites:
CMPG321 1-1 P 2024
 - Go through the ***Study Guide*** on eFundi
 - Get the textbook
 - Go through (Ch10 - 13th ed.; Ch12 – 4th ed.)
- Transactions and Concurrency Control**
