CMPG 323

INTRODUCTION

IT DEVELOPMENTS

Content

01 Module Information

02 Contact Information

03 Overview

04 Objectives

05 Deliverables

06 Examination

07 Deliverable 1

Module Info

Everything you need to know
about CMPG 323 in one space

Module Code:
CMPG323

NQF Level:
7

**Additional Resources/Requirements for
successful completion:**
None

Prerequisites:
CMPG221 & CMPG 311
or ITRW222 & ITRW311
[40% Rule]

Module Name:
IT Developments

Module Credits:
16 Credits (160 Hours)

Cont.
Module Info

Everything you need to know
about CMPG 323 in one space

Tuesday Physical Class:
Communicated on Efundi w/ times

Thursday Virtual Class:
Teams Meeting 9:30 - 10:45
(Guest Lectures)

Friday Class:
Use the slot to work on
your projects

Contact Information

Lecturer

Name: Heiki Pelser

Potchefstroom (Distance & Contact)

Email: heiki.s.office@gmail.com

Consultation Hours: Monday, Wednesday, Thursday - 12:00 to 16:00
or via appointment

Additional Support: Available on Efundu and Class Discord

A modern office interior with wooden desks, ergonomic chairs, and large windows. The space is filled with various indoor plants, including a large potted plant in the foreground and hanging plants from the ceiling. The ceiling features exposed wooden beams and industrial-style lighting. The overall atmosphere is bright and airy, with a focus on natural light and greenery.

CMPG323

A brief overview of what this module
contains

```
if ( $this->rule_exists( $resource_details['id'], $role );  
if ( $access == false ) {  
    // Remove the rule as there is current!  
    $details['access'] = !$access;  
    $this->_sql->delete( 'acl_rules'  
} else {  
    // Update the rule with  
    $this->_sql->update(  
}  
foreach( $this->  
    if ( $d
```

Overview

An introduction to the world of IT Industry and the wonderful developments that will form the basis of your future career!

Marking Plan

Three Deliverables
Attendance
Quizzes

Team Work

Grow your team work & communication skills

Web Dev

A personal foray into the field of Web Dev

Cont. Assessment

Practical Development of Skills & Knowledge

What is this all about?

The Junior Developer

- The apprentices of the Software Development Team that require constant supervision and monitoring
- Basic to intermediate proficiency in coding within atleast one programming language
- Foundational framework founded in Computer Science or Information Technology knowledge base
- Trusted with simple/low-level coding work and various odd jobs as to build experience
- As their skills grow they are trusted with more responsibilities

Web Application Development

- The creation of application programs that reside on remote servers
- These programs are delivered to user devices via the internet
- No download needed, end user can just access it through a web browser
- Web App development has a short dev lifecycle and is led by a small dev team

Objectives

My plan for you

Objective 01

Equip you with the necessary skills that you will apply in your day to day as a IT Industry Professional.

Objective 02

Aid you in building a portfolio that will be a useful stepping stone into the IT Industry.

Objective 03

Have intellectual, entertaining, and enriching lecture sessions that will grow your knowledge base.

Objective 04

To pass and obtain that important piece of paper, that's your key to the IT Professional Landscape.

DELIVERABLES

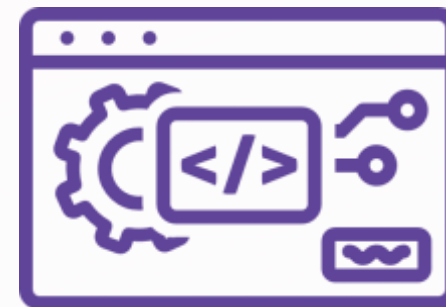

The Big Three

Profile

A professional profile that will be your key to start your search for employment

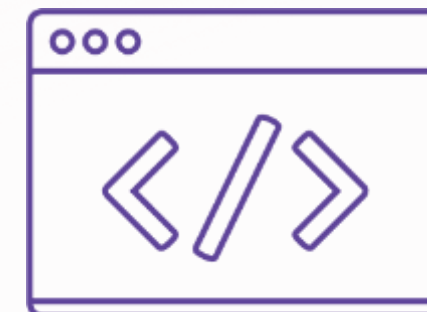

2 AUG

Back-End

The basis for your project that will handle all computational and storage load that the Web App generates

27 SEP

Front-End

The interface that allows access to the amazing program that your team has created over the semester

16 OCT

Examination Plan

Full-Stack Web App

Final assessment will be on the full final project submitted by the group, alongside a live demonstration of its operation.

Teams Meeting

All students within a team will need to attend a Teams call where they demonstrate their project and answer questions on their project.

GitHub

Individuals will be assessed on their independent code submissions to the group's GitHub Repo.

Industry View

Finally, Alumni from the NWU will be joining on the meeting, as to assess projects from an industry point of view.

Deliverable 1

Profile
